
Document Title

Doc Writer <doc@example.com>

Table of Contents

1. Introduction	1
-----------------------	---

A sample AsciiDoc [<http://asciidoc.org>] document.

1. Introduction

A paragraph followed by a simple list.

- item 1
- item 2

Here's how you say "Hello, World!" in Ruby.

A basic Ruby application.

```
puts "Hello, World!"
```

Tip

asciidoctor-fopub takes the pain out of converting a DocBook file to a PDF file like this one. All you need is a Java Development Kit (JDK) and this project. The rest of the software is fetched and configured by Gradle.

$a^{2+b}2 = c^2$

[]

```
sqrt(4) = 2
```

asciimath: $[C = \alpha + \beta Y^{\gamma} + \epsilon]$
